GL valve (inter)locks suit all types of handwheel operated valves - including Gate, Globe and Gear-operated valves.

Installing the (inter)lock on the host valve is a simple procedure as described below. Requiring no modification or hot-work to the host equipment, the anchor and adaptors are custom machined items. Universal Adaptors (UAS) may be supplied when precise valve topworks data is not available.

1. Mount lock adaptor and fix SFC nut.
2. Locate body to adaptor.
3. Tighten fixing screws (x3).
4. Tighten setting screws to set “Open” and “Closed” key release positions.

After removing the existing handwheel the GL is assembled as follows:
PRODUCT FEATURES

- 316 Stainless steel.
- Linear ‘coded-card’ key design.
- Robust construction.
- Proven reliability in all climates.
- Single or double key versions.
- Suitable for all handwheel operated applications.

No modifications to host valve.
Suitable for any valve type/model.
Can be installed on ‘live’ plant.
